

Advanced baling for a better environment

TT45, TT55, TT75 and TT75 multi-chamber small balers

Tony Team balers are simple and easy to use and represent excellent value for money. They provide a cost-effective means of removing card, polythene and other recyclable material from the waste stream and landfill, increasing recycling output and helping to keep waste areas clean and tidy.

The TT45 to TT75 models create bales up to 75 kg making them ideal for pubs, restaurants, hotels, supermarkets, warehouses, hospitals, colleges and fast food outlets. The TT75 multi chamber features twin chambers so that one chamber can be loaded while the other compacts, and different recyclable products such as plastic and cardboard can be compacted simultaneously. Additional chambers are also available.

Key Features

- Small footprint
- Simple and safe to use
- Extremely quiet
- Adjustable bale weight
- Includes lifting trolley
