

Advanced baling for a better environment

TT150, TT200 multi-chamber and TT250 mid-volume balers

Tony Team balers are simple and easy to use and represent excellent value for money. They provide a cost-effective means of removing card, plastic and other recyclable material from the waste stream and landfill, increasing recycling output and helping to keep waste areas clean and tidy.

The TT150 and TT250 models handle medium volumes of cardboard and polythene, so are ideal for manufacturing and industrial outlets with reasonably high throughput of recyclable material. The TT200 multi-chamber features twin chambers so that one chamber can be loaded while the other compacts, and different recyclable products such as plastic and cardboard can be compacted simultaneously. Additional chambers are available.

Key Features

- Simple and safe to use
- Extremely quiet
- Fully automated bale ejector
- Retaining claws to prevent spring back
