**Installing a Broan
waste compactor is literally
plug and go!**

**Everything about Broan
waste compactors
is designed for your
convenience.**

From top to bottom, and front to back. Start for instance, with the reversible-mount door. It opens like a refrigerator, simplifying access to an easy-to-reach and clean compartment. Industry-leading continual compaction force of 1,360 kgs and a 6 to 1 bag compaction ratio cuts a week's worth of waste down to size. Smart electronic controls, automatic cycling and an odour reduction system keep everything in order, even when you're away. But that's just part of the story.

Trash is compressed for several hours until it holds its new, compacted shape. When the ram releases, the container is ready to take on more.

Broan Elite models ship ready to install under the counter, but can easily be converted to a free-standing model with the addition of a stabilising plate (sold separately).

Our six-month odour reduction disc features a replacement indicator.

A dimpled compacting plate crushes bottles and cans.

Full extension ball-bearing drawer slides easily handle 16 kg of compacted trash.

Broan Elite models are available in Appliance Black or Stainless Steel finishes.

Broan Elite

- Manual operation
- Manual advance odour control
